

A

# CATALOGUE OF FRUITS

FOR

CULTIVATION IN THE UNITED STATES AND CANADAS ;

IN TWO DIVISIONS.

DIVISION FIRST—EMBRACING THOSE STATES LYING NORTH OF THE SOUTHERN LINE OF VIRGINIA, TENNESSEE, MISSOURI, ETC., AND EAST OF THE ROCKY MOUNTAINS, INCLUDING THE CANADAS.

DIVISION SECOND—THE STATES SOUTH OF THE LINE ABOVE NAMED, AND WEST OF THE ROCKY MOUNTAINS.

COMPILED UNDER THE DIRECTION OF THE

## AMERICAN POMOLOGICAL SOCIETY,

FROM THE

*Reports of State and District Committees.*

INTENDED TO EXHIBIT, IN A FORM CONVENIENT FOR REFERENCE, THE VARIETIES OF FRUITS BEST ADAPTED TO THE DIFFERENT STATES AND LOCALITIES: SUBJECT TO FUTURE REVISION AND CORRECTION, AS EXPERIENCE MAY RENDER NECESSARY AND PROPER.

---

REVISED EDITION.

---

PUBLISHED BY THE SOCIETY.

BOSTON:  
SAM'L CHISM,—FRANKLIN PRINTING HOUSE,  
No. 134 WASHINGTON STREET.  
1868.

## PLAN OF THE CATALOGUE.

---

THE arrangement of the varieties is alphabetical, according to the nomenclature adopted by the Society. Synonyms are given in a few instances only, where it seemed necessary; and these are placed under the adopted name, in italics. The tabular arrangement has been adopted to obviate the necessity of repeating the names of varieties several times, as would be required if a separate Catalogue were made for several sections.

It has been decided by the Committee not to attempt, at this time, to give descriptions of the fruits recommended, but simply to indicate the season of maturity, use, and a few other particulars of importance, which require but little space. In regard to the season, it will be observed that, instead of naming the month or months in which fruits mature, the general terms "Summer," "Autumn," and "Winter," have been used; the peculiar arrangement of the Catalogue renders it impracticable to be more exact in this particular. For example: The Early Harvest Apple is reported as succeeding in almost every State and Territory in the Union, in one locality ripening in May, and in another in July, or even in August, — a difference of two months or more; and yet in every locality it is strictly an *early summer apple*.

The columns are arranged thus: First, the names of varieties; next, the season, use, etc.; and then the States or Districts, the names of which stand at the head of the columns.

The State or District in which any variety is recommended, is designated by a star (\*); and in cases where a variety is recommended as being of great superiority or value in any locality, the indication is two stars (\*\*).

It being necessary to carry the column arrangement across two pages, numbers are used on the margin of each page, to prevent errors in following lines.

### DIVISION FIRST.

Embracing those States north of the southern line of Virginia, Tennessee, Missouri, etc., and east of the Rocky Mountains, including the Canadas.

## I.—APPLES.

---

EXPLANATION OF COLUMNS.—The first column on the right of the name gives the season of maturity. The second, the particular uses for which the variety is best adapted; and the remainder the Districts in which the varieties are recommended.

EXPLANATION OF ABBREVIATIONS.—Seasons: S. summer; A. autumn; W. winter; E. early; L. late. Those not designated as early or late of their season may be regarded as medium.

USE.—K. designates varieties recommended only for kitchen purposes. C. those specially for cider. Those not marked K. or C. may be regarded as dessert or table sorts. M. designates those most valued for market.

\* Star opposite a variety indicates that such a variety succeeds well in the District named at the head of the column.

\*\* Two stars distinguish those most highly recommended.

## II.—PEARS.

---

The Columns indicate—1st. The Season; 2d. Use; 3d. Stock; and the remainder the Districts in which the varieties are recommended.

The abbreviations are—

SEASON.—S. summer; A. autumn; W. winter; E. early; L. late.

USE — K. denotes those recommended *only* for kitchen purposes; M. those most profitable for market.

STOCK.—Q. those which are known to succeed well on the Quince stock.

### III. — CHERRIES.

---

The columns explain — 1st. The season of maturity; 2d. The class to which the variety belongs; and the remainder the Districts in which the varieties are recommended.

The abbreviations are —

SEASON. — E. early, as Early Purple Guigne, Belle d'Orleans, Kentish, etc., which usually ripen at Rochester, lat. 43 deg., from the 10th to 20th of June, according to the season. M. medium season, those ripening between 20th of June and 20th of July; and L. late, those ripening after that time.

CLASS. — II. hearts, or tender-fleshed, sweet cherries, such as Black-Heart or Gov. Wood. B. bigarreau or firm-fleshed, sweet cherries, like Graffion, Napoleon, etc. D. dukes, having more or less acidity, as May Duke. M. Morellos, having generally acid fruit, used chiefly for kitchen or confectionery purposes.

## IV. — PEACHES.

---

The columns explain :

1st. The class, as Freestone or Clingstone, to which the variety belongs.

2d. The color of the flesh.

3d. The season of maturity; as Early, Medium, or Late. Those designated as Early, ripen in lat. 43 deg., previous to or about Sept. 1st. Medium, those ripening from 1st to 15th of Sept.; and Late, those after that period. A few of the very early and very late are so designated. The remaining columns denote the Districts in which the varieties are recommended.

Abbreviations :

CLASS.—F. freestone; C. clingstone.

FLESH.—W. white, or pale-colored flesh; Y. yellow, or yellowish flesh.

SEASON.—E. early; V. E. very early; M. medium; L. late; V. L. very late.

## VII.—PLUMS.

---

The columns indicate—1st. Color of Fruit; 2nd. Whether Freestone or Cling; 3d. Uses to which best adapted; 4th. Season of maturity; and the remainder the Districts in which the varieties are recommended.

The abbreviations are as follows:—

COLOR OF FRUIT.—D. dark, including all red, purple blue, and other dark-colored varieties; P. pale, including the green, yellow, etc.

STONE.—F. freestone; C. clingstone.

USES.—T. table; K. kitchen; D. drying; M. those most profitable for market.

SEASON.—E. early; M. medium; L. late; V. E. very early; V. L. very late.

The divisions of season for Peaches apply also to Plums.

## X.—FOREIGN GRAPES.

As the Foreign Grapes are for cultivation under glass, they are not subject to those variations induced by climate or soil, and, therefore, they may be regarded as equally adapted to all localities. Very few of the local committees have made any report in reference to these Grapes. The list below contains such as have been already adopted by the Society, with a few others very generally esteemed.

The columns explain—1st. The color of the fruit; 2d. Flavor; 3d. Season of maturity. In flavor the only distinction is between those that are simply sweet, as the Chasselas or Hamburgs, and those having a distinct musky aroma, as the Muscats.

No.	NAME.	COLOR.	FLAVOR.	SEASON.
1	Barbarossa ..... <i>Prince Albert.</i> <i>Brizzola.</i>	Black.	Sweet.	Very Late.
2	Black Damascus .....	Black.	Sweet.	Late.
3	Black Frontignan .....	Black.	Muscato.	Late.
4	Black Hamburg .....	Black.	Sweet.	Medium.
